

The intent of Match Day is to help organizations build endowed funds while leveraging matching dollars that may be used for an immediate grant or to further add to their endowment. The pandemic has challenged all of us, particularly the finances of nonprofit organizations and groups. The Foundation Board of Directors remains cognizant that we have not fully realized the financial impact from the shutdowns and cancellations.

With that in mind, the board has decided to allow flexibility for the 2021 Match Week event. For each donation to a participating fund, the organization will be given the choice of placing all or part of it in the endowment or using all or part of it as a grant. The matching portion will remain the same as in year's past.
